

custom edge profiles

Our new range of made-to-order Edge Profiles enables you to achieve a fabulous edge-finishing result in your home or around your swimming pool. Almost all floor tiles can have an edging profile applied to them. Edge profiles are commonly used for stair step treads, swimming pool copings and balcony edges. Talk to us about creating a beautiful edge for your tiles. Allow approximately 10 working days to produce.

The Full Bullnose

This neat, fully-rounded edge is designed to both soften the tile edge and also give the option of creating a small overhang to add a simple but effective feature.

The Full Bullnose Laminate

The Laminated Full Bullnose is a chunkier, more traditional profile for those who prefer a thicker and more prominent look on their tile edging.

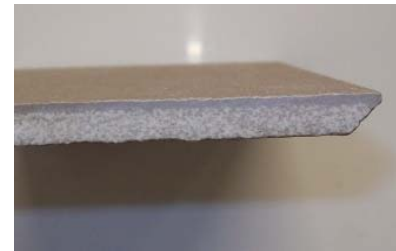

The Half Bullnose Edging Profile

This is perfect for stair nosing and skirting tiles are enhanced by it. This edging finishes sill tiles to perfection and patio & balcony floors receive a professional look.

Step Tread Grooves

By cutting grooves *into* the tile itself, a perfect non-slip stair nosing is achieved without sticking a self-adhesive grip strip (which has the potential to peel off over time).

The Mitred Edge

Mitred edges provide a simple, clean finish when two tiled surfaces meet at a right angle, eg on stairs and patios.

Apron with Round Edge

The construction of this profile involves bonding a strip of tile (usually of 30 – 90mm height) at right angles onto the floor tile.

The Laminated Flat Edge

The Laminated Flat Edge provides a chunky square look finish to the edge of your pool or stair treads.
