

encaustic cement tile series

The Tile Mob presents a new range of Encaustic floor & wall tiles now on display at our [Mitchelton showroom](#). Decorative and colorful, Encaustic tiles are hand-crafted by pouring matt mineral pigments into metal moulds before they are fused to a cement body using a hydraulic press.

Floors laid with encaustic tiles are noted for their multi-color patterns, durability & sophisticated look and have been widely used over time by Moroccan, French & Spanish designers. These 200x200x16mm square tiles are currently available in 19 different solid colors and 10 distinctive 'accent' patterns. The hexagonal type is 200mm from edge to edge and is available in 4 solid colours.

Encaustic cement tiles are suitable for floor use in both indoor and covered outdoor situations. Often used in areas such as courtyards, entryways, patios, kitchen & bathroom floors, they are also becoming increasingly popular in the commercial sphere for hotels, bars and restaurants.

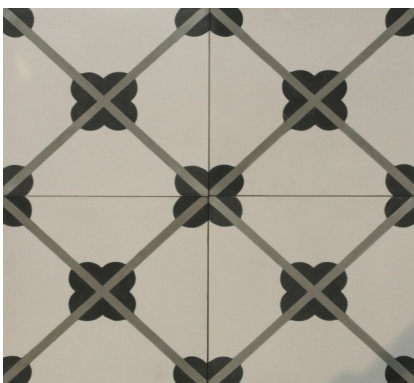

There are a multitude of possible laying patterns & combinations with Encaustic tiles. Patterned tiles can be bordered with plain tiles, used as medallions among plain tiles, or as full field tiles on their own. We recommend sealing Encaustic cement tiles for ease of cleaning. Visit our [Brisbane Tile Showroom](#) or contact us at sales@tilemob.com.au or Ph (07) 3355 5055 for more information.
