

easy grout cleanup system

Newly-arrived at our [Mitchelton Tile Showroom](#) in Brisbane is the eco-friendly Raimondi 'Easy Grout Cleanup System' (product code: NC222773).

This Italian-made grout cleanup sponge & bucket has a **removable biodegradable plastic insert bag** to collect grout solids for transfer to landfill, thereby not contaminating domestic & public drainage systems.

The 3 cleaning rollers are at a 15 degree incline to align with natural arm movements and have raised edges to prevent water dripping down the sides of the bucket. This package is ideal for cleaning excess grout from both walls and floors. The bucket is engineered from impact-resistant plastic for longer life, with twin plastic rollers on the underside base, fitted with wear-resistant sockets. The high-capacity 25 litre tank reduces the need for frequent water changes and the high-absorption "Sweepex" sponge allows for perfect cleaning every time.

This is an ideal tool for any tradesperson or do-it-yourself tiler who wants to minimise their environmental impact during installation. For further information, contact us at: sales@tilemob.com.au or on (07) 3355 5055.
